Creating A Home Management Center

Every home requires the ability to:

1. Quickly locate keys and emergency tools
2. Have instant access to medication information and history
3. At-your-fingertips emergency numbers
4. Substitute caregivers information AND
5. Organized and non-stressful access to all of the above

Creating a home management center and notebook ensures that, on a daily basis and in the event of an emergency, information and tools can be quickly and easily accessed by the adults, children, and temporary caregivers of a home. It is necessary to teach children more than to dial 911 if an adult is suddenly unavailable. Knowing where essential information and tools are located will assist emergency personnel in caring for the incapacitated person.

This workshop will offer lists of essential information and tools and ways to create a home management center in every home or apartment.
